

CABINET BAZAAR
KITCHEN & BATH

How to Measure Your Kitchen

1. Measure Wall Lengths

Start from one corner and measure each wall straight across (in inches).

2. Mark Doors & Windows

Measure the width of each door and window, and note how far they are from the corner.

3. Locate Key Items

Mark where your sink, stove, and fridge are positioned (center points if possible).

4. Measure Ceiling Height

This helps determine cabinet height options.

5. Include Obstacles

Note anything that affects cabinets like vents, outlets, or columns.

6. Draw a Simple Sketch

It doesn't have to be perfect—just label all measurements clearly.

7. Double Check Everything

Re-measure to avoid mistakes before sending it.
